

Charities

We support the supporters

One Stop Support have worked with charities and non-profit organisations for the past 9 years, helping each of our clients maintain a cost effective, reliable IT network infrastructure.

We understand your IT network can sometimes be very low on the list of priorities. We are experts at getting the most from a tight budget: planning cost-effective networks, support plans and sourcing hardware and software at significantly reduced prices for the charity sector.

By providing an economical support solution, we play a part in ensuring your funds and donations go to the right places. One Stop Support have worked with charities and non-profit organisations for the past 9 years, helping each of our clients maintain a cost effective, reliable IT network infrastructure.
